

OORT RESIN TABLE COLLECTION - OBJECT 001H

These smooth, rounded tables were inspired by the theoretical Oort Cloud of ice planetesimals believed to encircle our solar system. We imagined colourful objects being gently eroded over eons, as the travel within the cloud.

Years of testing and experimenting led to the perfect method to create these futuristic forms. OORT are created in our studio using a process which takes many days where resin is added to the interior of a rotating mould layer by layer, to build up structure and colour depth, using as little material as possible. Polished to an ultra glossy finish, the exterior forms are precise while the gently varied and bubble infused interiors tell the story of its creation.

A universe captured in resin.

OBJECT 001H, 2022

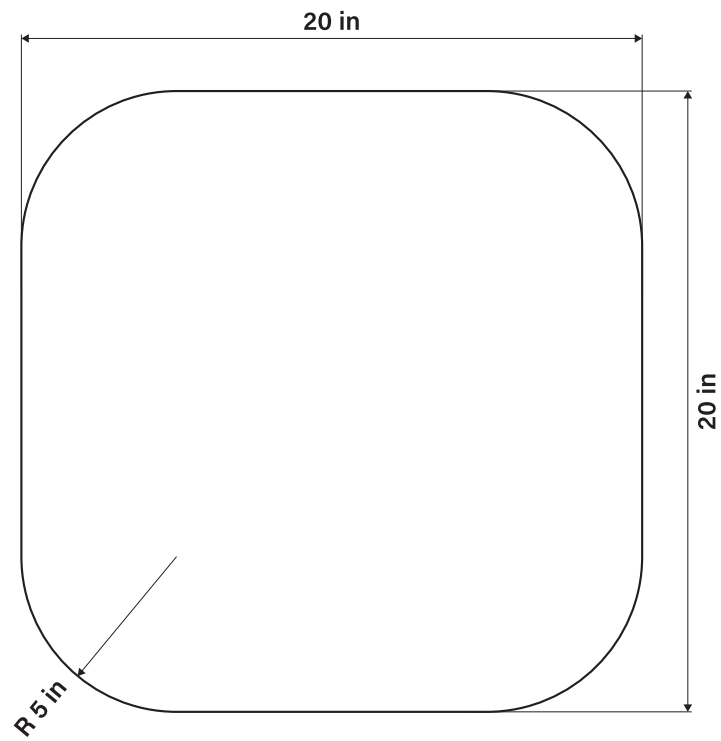

Materials: Resin, pigment

Origin: Canada

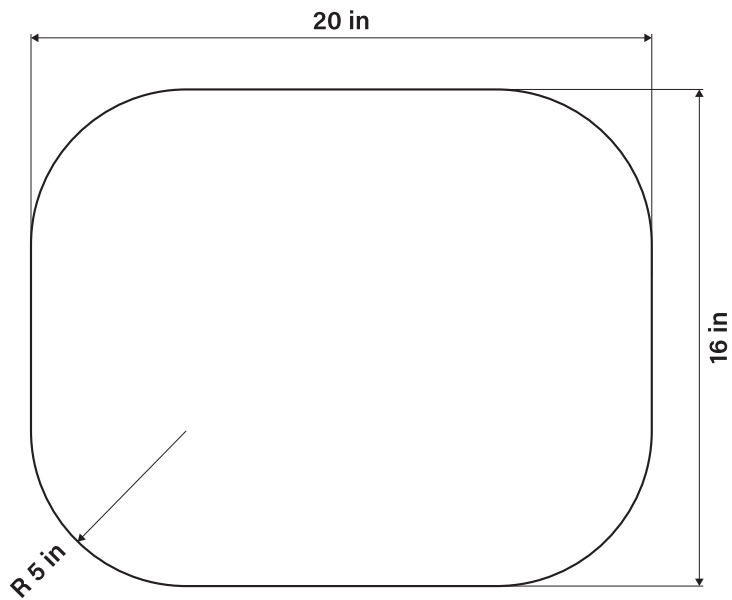

Production: 6-8 weeks

Dimensions: 20" W x 20" D x 16" H
